

FIRMENICH HEADQUARTERS IN MEYRIN (PROJECT)

views: Gensler - 1106

Founded in 1895, Firmenich is the largest Swiss family-run company in the field of aromas and perfumes. The company made the strategic decision of bringing together R&D and perfume-making activities. The aim was to reorganize the whole industrial site at Meyrin-Satigny in the manner of a campus, with new buildings for laboratories and various administrative services, catering, meetings and conferences. Comprehensive scheduling and pre-project work enabled proper specification of and possible adjustments to the works process, with high technical and energy requirements (Minergie-Eco, Leed). This project was postponed following the financial crisis of 2008.

CLIENT
Firmenich SA

ARCHITECT
Gensler, London

TEKHNE SERVICES

Client assistance:
- programming
- feasibility
- direction of pre-project phase

DATE | COST
2007-2008
CHF 200 million

DIMENSIONS
Floor area 53,000 m²
Gross volume 246,000 m³
